+1 (604) 789-9114

Product designer with 15+ years of experience building products people actually want to use, with the last decade focused on financial technology. I work across the full spectrum: strategy, systems, interaction, and code when the job calls for it. I've led design teams, mentored individual contributors, and shipped products independently as a founder. My strongest work happens at the intersection of complex problems and clear thinking.

SKILLS

EXPERTISE

User research, Design strategy, Interaction design, User interface, Usability testing, Design systems

KEY TOOLS

Figma, Cursor, React, HTML/CSS, Origami, Adobe CC, Spline, Webflow

PLATFORMS

Web, iOS, Android

FRAMEWORKS

Agile, Double Diamond, Shape Up

LANGUAGE

English (Fluent)
French (Native)

ASSET

PRODUCT DESIGNER · 2025 → 2026

Vancouver, Canada (Hybrid)

- First and sole designer at an early-stage AI-driven fintech startup, responsible for every design touchpoint from brand through to product.
- Tackled hard problems from day one: transaction categorization, financial workflow clarity, and making embedded accounting feel simple for SMB customers with no design precedent to build on.
- Built the design system from scratch, creating the foundations, component library, and documentation a fast-moving engineering team needed to ship consistently.
- Led branding end-to-end, establishing a visual identity and design language that holds together across product, marketing, and communications.
- Designed and built the marketing site, and contributed directly to the engineering repo using Cursor and AI-assisted development tools.

ARRIVED

PRINCIPAL PRODUCT DESIGNER · 2023 → 2025

Seattle, USA (Remote)

- Led a full rebranding and design system overhaul across responsive web and iOS, establishing a visual and interaction language the whole team could build on.
- Redesigned the investor portfolio experience end-to-end: map view, asset allocation, dividend clarity, and performance context, all grounded in user research and competitive analysis.
- Introduced comparison tools and benchmark data so investors could understand their returns, not just see them.
- Built interaction frameworks and prototypes that accelerated alignment between design and engineering on complex product decisions.
- Worked as a fully autonomous IC, regularly taking on high-impact work outside the formal roadmap without being asked.

INDEPENDENT PROJECTS

H2H (HEAD-2-HEAD)

FOUNDER & DESIGNER · 2024 → NOW

Founded and designed a one-night fantasy sports iOS app for head-to-head challenges across NHL, NFL, MLB, and NBA. Took the product from concept to a live App Store release, designing and building every piece of it solo.

FROMME HERE

FOUNDER · 2022 → 2024

Created a local headwear brand for the North Shore mountain biking community, covering brand identity, product design, and creative direction.

And also...

2009 → 2017

Earlier independent projects include IBS and Me (2017), Mountainr (2014), Krushon (2012), and Faktis (2009): mobile apps and a design collective, each taken from concept to launch.

EDUCATION

L'École de Design Nantes Atlantique

2005 → 2010

Nantes, France

Master's Degree in Design (MDes) with jury mention and highest honours. Interaction Design User Experience Design and Tangible Interfaces.

IDAS, Hongik University

2007 → 2008

Seoul, South Korea

International exchange with the International Design School for Advanced Studies (IDAS) under the Masters in Design program.

BENCH

PRINCIPAL PRODUCT DESIGNER · 2020 → 2023

Vancouver, Canada (Remote)

- Built Bench's first unified design system, bringing consistency to a product that had grown faster than its foundations.
- Led and mentored a team of product designers, creating the feedback loops, critique culture, and growth frameworks that helped people do their best work.
- Shipped the 1099 in-app experience, categorization controls, and journal entry statuses, each designed to reduce the back-and-forth between customers and their accounting associates.
- Shaped design strategy and leaned on Shape Up and Double Diamond to bring structure and predictability to a fast-scaling team.
- Worked closely with product and engineering leadership to keep design roadmaps aligned with what the business actually needed.

MOGO

LEAD PRODUCT DESIGNER · 2016 → 2020

Vancouver, Canada (Remote)

- Carried both an IC and a leadership role: personally designed MogoCrypto, MogoSpend, and the Mogo Design System while building and running the design team.
- Grew and coached the design team through a period of rapid company expansion, overseeing scope, resourcing, and individual development.
- Elevated design to a strategic function at Mogo, working alongside executives to shape product vision as the platform scaled from two products to seven.

Sr PRODUCT DESIGNER · 2016 → 2017

Vancouver, Canada (Remote)

- Designed the web MVP for Mogo's platform pre-IPO, translating user needs and business goals into a product experience from the ground up.
- Established the design foundations that carried the product through its earliest period of public growth.

AND ALSO...

Senior UX/UI Designer at Qudos (2014–2015) · Product Design Lead at Invoke Labs (2011–2013) · Interaction Designer at Dsquare / Niji, Paris (2010–2011) · Freelance Product Designer (2007–2013)
